

# Quality and Visual Standards

1. The maximum allowed surface foil undercut distance for any sized hole is 0.75 mils.
2. Landing pad diameters can be no less than 67% of the surface opening diameter
3. Landing pad surfaces shall be free of debris(melted glass, glass bundles, or resin chunks)
4. Glass bundles may protrude a distance no greater than 20% of the surface opening diameter beyond the edge of the hole wall.
